

Logic 400 Office Chair

DESCRIPTION

The Logic 400/300 is probably the best ergonomic chair on the market.

The Logic 400 can be adapted to suit the individual, taking into account their height and weight so that the correct loading is placed on the body.

The degree of neck and lumbar support needed is also taken into account, resulting in a chair that fits you, follows your smallest movement and gives you full strain relief, support and comfort. Your back is fully supported in every sitting position.

[Gaja and Leather Fabric Swatch. We stock Gaja Black.](#)

This chair complies with all EN 1335 standards

Benefits of Logic 400

Logic 400 - the ultimate back care office chair.

How is it different from other chairs?

It is a chair that fits the user. The Logic 400 will continue to support your back while you lean forward to type or back while you are on the phone. A chair made for you. As you sit in it you will feel the difference. A genuine orthopaedic chair for the office.

The Logic 400 can be adapted to suit the individual, taking into account their height and weight so that the correct loading is placed on the body.

The degree of neck and lumbar support needed is also taken into account, resulting in a chair that fits you, follows your smallest movement and gives you full strain relief, support and comfort.

The back is fully supported in every sitting position.

A chair based on the movements of the human body (Important for back sufferers)

Many chairs carry the label “orthopaedic chair” without any solid basis for this description. Sit in the Logic 400 and you will feel the difference.

The Logic 400’s design is inspired by the human anatomy, and by two joints in particular – the knee and the hip. You will notice the effect as soon as you sit down.

First of all,

The lumbar support remains in the correct position, regardless of your movements, which helps facilitate an upright posture. This is because the backrest height remains constant, regardless of the seat angle.

Secondly,

Your feet always remain in contact with the floor, minimising the pressure against the underside of your thighs, which eliminates numbness due to restricted blood circulation because the vertical movement of the front of the seat is minimal when leaning backward or forward.

Your next position is your best position.

As office work often involves prolonged and constrained sedentary work, the introduction of a chair that encourages movement can add huge benefits to health of worker.

A chair which promotes dynamic and active sitting like the RH Logic 400 is a very important preventative measure and solution to these problems.

With a Logic 400 you get a made to measure office chair that fits your body, giving you the specific support you need, where you need it. And will also ensure that supports stays with you while you move and work.
