

HM390

The office chair for customers who don't want to compromise and who are looking for a modern designer chair with active seating.

HM390

A top-quality Swedish-made office chair. This is the office chair for those of you who don't want to compromise and who are looking for a chair with active sitting. With a KOS Ergonomics office chair, you can sit for long periods, and still be active throughout your working day.

When you choose a chair from the new KOS Ergonomics series, you have chosen world-class active seating. Every detail is premium, and comes from Europe's leading suppliers. The backrest of the HM390 model is both the highest and widest of the HM-chairs, and comes with a large seat and a high back as standard. But your shape decides how you adjust your chair so that your sitting position is as healthy, ergonomic and pleasant as possible. If you want, you can also choose between several add-ons to further enhance that premium feeling.

Why not choose a polished aluminium base?

THE TRIANGLE CUSHION

The triangle cushion not only provides a neat and elaborate detail, but also fulfils a purpose. It offers relaxation for the upper back while providing mild pressure and support between your shoulder blades. This support counteracts tension headaches and tension in the thoracic spine.

ADJUSTABLE BACKREST

The models in the new HM series provide ergonomic support in all positions thanks to their adjustable backrest. The recline mechanism (multi-synchron) and the seat follow the body's movements and create the right conditions for the spine and pelvis.

LUMBAR SUPPORT CUSHION

The unique double lumbar support cushion is standard in the HM series.

PERFORMANCE

HM390

The standard version HM390 comes with a high back and large seat, a base in black powder-coated aluminium, a Type 1 gas lift, black castors and a dual lumbar support cushion.
